Abstract

The yCards package provides utilities to create cards-like (cards refers here to the web-UI concept) graphical elements.

1 Usage

1.1 Palette Type

`\DeclarePaletteType` `\DeclarePaletteType{name}`
Declare a Palette type named *name*. This command will never throw any error.

2 Implementation

Utilities

2.1 Error throwing

The following commands send recurrent errors or warning.

2.1.1 Generic Commands

`\@ycp@error@message` The error message to display after all errors.
1 `\DeclareDocumentCommand{\@yc@complete@card@skeleton}{-}{\%`
2 `For details have a look at the 'yColorPalette' manual.\%`
3 `}`

*This document corresponds to yCards ?, dated ?.
